### SUMMARY

Dynamic IT professional with hands-on experience in IT consulting and a teaching assistant role in **Network Security** at **Linnaeus University Sweden**. Certified in **Cisco CCNA**, **Microsoft Azure**, and **Microsoft 365**, I excel in leveraging cutting-edge technologies to enhance user experiences and boost organizational performance. Known for exceptional troubleshooting skills and maintaining composure under pressure, I am dedicated to delivering outstanding results and driving innovation.

### SKILLS

- Azure Virtual Machines • Azure Storage • Azure Networking • IaC (ARM, Bicep) • Azure Container Instances • Python
- Network Troubleshooting (TCP/IP, DNS, DHCP) • Server Administration (Windows server, Linux) • Git • Docker

### WORK EXPERIENCE

#### LINNAEUS UNIVERSITY

Teacher Assistant for Network Security Program

Växjö

March 2024 – June 2024

- Designed and implemented practical scenarios and hands-on exercises, simulating real-world network security challenges to prepare students for professional roles and enhance students' comprehension.

#### ANIMALS.AI

IoT/Networking Intern

Helsingborg

Nov 2023 – Jan 2024

An international startup with a mission of leveraging AI to bring innovative solutions to the agriculture industry in Sweden.

- Implemented and managed NAS systems with RAID configurations, significantly enhancing data redundancy and fault tolerance for critical storage systems.

#### IRIC CONSULTING

IT Administrator

Tehran

Feb 2018 – Mar 2021

A prestigious IT consulting firm providing a wide range of services, including virtualization, Cisco networking, and Microsoft 365. These robust IT solutions cater to small businesses and enterprise-level companies seeking to elevate their operations.

- Led the integration and administration of Intune and Azure AD, improving device security and compliance, and significantly boosting operational efficiency.
- Planned, designed, and advised migrations of on-premises data to Microsoft 365 for clients, leveraging cutting-edge cloud technologies to enhance productivity and improve user experience.
- Configured and managed WSUS to automate and streamline the deployment of Windows updates across 100+ endpoints, reducing manual update efforts and ensuring timely patch compliance.

### EDUCATION

#### LINNAEUS UNIVERSITY

Bachelor of Computer Science with Specialization in Network Security

Växjö, Sweden

June 2024
